

LT 35 Load Transfer Station

TAKE A LOAD OFF . . .

With a Load Transfer Station from Columbia Machine. The Pallet-to-Pallet Load Transfer Station (LT 35) greatly simplifies the job of transferring palletized loads from one pallet type to another. Load Transfer Stations are capable of transferring products that are packaged in cases, barrels, drums, bags and pails from one pallet type to another, including Plastic, Chep and GMA pallets in both receiving and shipping applications. The LT 35 receiving deck and cart roll on floor tracks, allowing the machine to operate without mounting it to the floor. The LT 35 folds up for easy storage or shipping to different locations. Make your next load transfer an easy one with the LT 35.

BENEFITS:

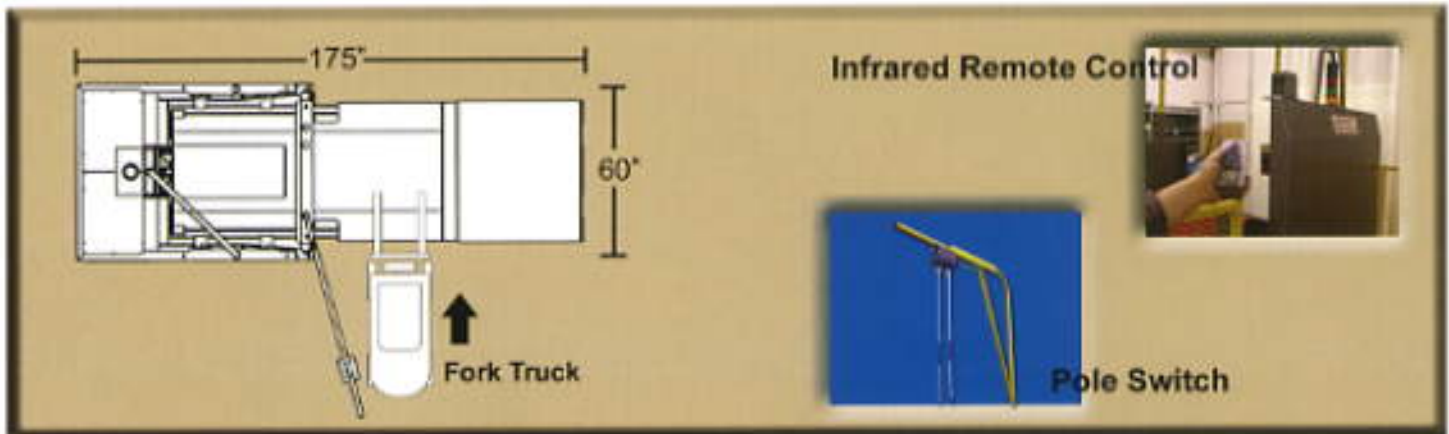

- Eliminate injury to warehouse personnel
- Streamline plant and warehouse operations
- Less wear and tear on lift trucks
- Improve plant and process cleanliness
- Reduce shipping costs
- Easy-to-operate (ETO)

To view a video of the LT 35 in operation and for more information on Columbia Machine's complete line of Load Transfer Stations, please visit www.loadtransfer.net or call us at 1-800-628-4065.

LT 35 Pallet-to-Pallet Load Transfer

The forklift driver activates the LT 35 by using the overhead pull cord allowing the operator to cycle the machine from the forklift. The transfer cycle is completed with one 30 second cycle, then the unit extends and is ready for the next transfer with a total transfer cycle time of less than 60 seconds.

Since the LT 35 hydraulic and electrical components are self-contained, it can be positioned anywhere that can be reached with a 230 or 460-volt power supply. The LT 35 can be loaded from either side and unloaded from three sides, allowing for the use of four-way pallets. The LT 35 accepts 48" x 40" pallets and can be fitted with drop-in deck shims to accommodate different pallet heights. The automatic pallet-stacker (magazine) will accept up to 20 standard pallets.

FEATURES:

- Cycles in less than 60 seconds
- 3,500 lb. load capacity
- Automatically stacks up to 20 pallets
- Hydraulically actuated
- Extremely heavy-duty construction
- 5 HP integral hydraulic power unit
- Easy to operate (ETO)
- Push button controls / overhead controls
- Weighs 4,000 lbs.
- Three-way handling of outbound loads
- Very low maintenance
- PLC controlled
- 230 or 460 VAC power supply
- 24 VDC controls
- UL rated control panel

OPTIONS:

- Cold Climate Package - includes heaters for oil tank and control panel
- Stainless steel paint
- Infrared remote control
- Automatic adjustment for variations in pallet height
