## Load Transfer Station

### TAKE A LOAD OFF...

With a Load Transfer Station from Columbia Machine. The Load Transfer Station (LTS) is made up of a frame, receiving deck, and a load platen. The LTS is designed for the purpose of exchanging pallets under various product types such as cases, barrels, drums, bags and pails. The LTS speeds and simplifies receiving and shipping by making it easy for a single lift truck operator to transfer loads to alternate pallets such as plastic, CHEP, GMA, pallet board or slip sheet. Make your next load transfer an easy one with the LTS.

### BENEFITS

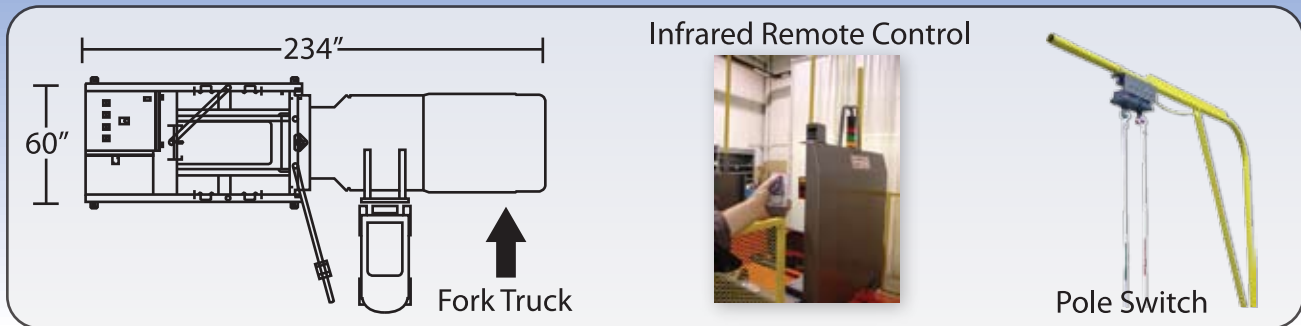

- Eliminate injury to warehouse personnel
- Streamline plant and warehouse operations
- Less wear and tear of lift trucks
- Improve plant process cleanliness
- Reduce shipping costs
- Easy-to-operate

To view a video of the LTS in operation and for more information on Columbia's complete line of Load Transfer Stations, please visit [www.loadtransfer.net](http://www.loadtransfer.net) or call toll-free at **1.800.628.4065** / direct at **1.360.694.1501**.

# Load Transfer Station

A lift truck operator using a pull cord activates the LTS. Since the LTS hydraulic and electrical components are self-contained, it can be positioned anywhere that can be reached with a 230 or 460 volt wiring connection. The LTS can be accessed from two sides for loading or three sides for unloading depending on its position in relation to surrounding walls, racks, or controls used. The integral pallet-stacking (magazine) will accept up to 20 standard pallets. The actual cycle time of the machine is less than 60 seconds. This may be modified by the speed and efficiency of the forklift operators.

## FEATURES

- Cycles in less than 60 seconds
- Weighs 6,400 lbs.
- Automatically stacks up to 20 pallets
- Hydraulically actuated
- Extremely heavy-duty construction
- Overhead pivot pole controls
- Easy to operate
- 5 HP integral hydraulic power unit
- 4,000 lb. load capacity
- 3 Emergency stops
- Very low maintenance
- Allen Bradley PLC
- 230 or 460 VAC power supply
- 24 VDC controls
- UL rated control panel

## OPTIONS

- Cold Climate Package: heaters for oil tank and control panel, UHMW transfer plate cover
- Infrared remote control
- Automatic pallet height adjustment
- Adjustable back rest to "inset" loads
- Stainless steel paint
